ABOUT ME

My name is Deniz, and I am a 27-year-old dedicated self-learner and software developer. I devote a significant amount of time to enhancing my skills through code review, reading, and engaging in side projects beyond my regular work. I take pride in my strong algorithmic and problem-solving abilities, valuing discipline and the importance of fostering positive professional relationships. I hold knowledge sharing and continuous learning in high regard as fundamental principles in my career.

WORK EXPERIENCE

Frontend Engineer, HotelRunner, Izmir

Aug 2023 - Present

HotelRunner is a cloud-based digital hotel management platform that helps hotels manage their online presence, optimize reservation processes, and increase revenue. As a frontend developer, I utilized React, React Native, and JavaScript to design and implement web components and a comprehensive design system, enhancing user experience and interface consistency. I also developed CI/CD pipelines, improving our development efficiency. HotelRunner supports the digital transformation of hotels worldwide with its reliable and effective platform.

Front-end Developer, Ginoa , Remote (Contract)

Feb 2023 - Jun 2023

As a developer for the Ginoa web3 NFT trading application, I played a key role in both the back-end and front-end development. Using technologies such as React, Next.js, and TypeScript, I contributed to building a robust and user-friendly platform. By following Object-Oriented Programming (OOP) principles and staying updated with the latest advancements, I wrote clean and maintainable code. Ginoa is now a reliable and efficient marketplace for NFT enthusiasts to explore and trade digital assets seamlessly.

Software Developer, Riskomer OSGB, İzmir

Feb 2021 - May 2022

I have been contributing as a software developer at Riskomer ISG, where I have excelled in both frontend and backend development roles. My achievements include:

- Creating a taxi management system utilizing the WhatsApp Web API.
 - Developing an e-pulse-like application for Turkpark Laboratory using Laravel and Vue.js, featuring a robust role-based system.
 - Building a taxi application with React Native.
 - Designing and implementing static applications using Vue.js.
- These projects showcase my ability to deliver efficient, scalable solutions that meet client needs and contribute to organizational success.

Software Developer, Forwardie, Izmir

May 2022 - Feb 2023

At Forwardie, I emphasized Object-Oriented and SOLID principles, excelling in backend with PHP (Laravel) and frontend with vanilla JavaScript. Forwardie specializes in innovative logistics and supply chain solutions, leveraging advanced technology to streamline operations and boost efficiency. My role has been pivotal in advancing software solutions that redefine logistics practices.
